Our Ethical Investment Philosophy

Our Ethical strategies provide access to collective investments within a globally diversified managed portfolio taking into consideration a range of socially responsible criteria.

The portfolios look to limit exposure to companies which are substantially involved in or cause animal testing (non-medical); countries or companies with evidence of poor human rights records; companies whose main source of revenue is gambling, arms production and export, production and sale of tobacco, production and sale of weapons systems and those who irresponsibly promote alcohol. We look to exclude companies involved in adult entertainment and nuclear power where possible.

Many of the funds used also favour investment in companies with products or services the manager deems of benefit to society and/or the environment. For example, investing in companies involved in providing renewable energy.
