Risk Profile

Risk Profile 4/10

This is a cautious strategy, where the emphasis is upon steady returns and the majority of the portfolio will be invested in lower risk investments. This strategy will invest up to a maximum of 35% in equities with the aim of enhancing returns over the medium to long-term and combating inflation. Investors accept that the overall portfolio will show losses over certain periods but are accepting the moderate risk in return for potentially achieving returns in excess of cash over the medium to long term.

Key Objectives

The portfolio aims to provide an attractive total return through income generation and long-term capital growth. This will be achieved by investing in UK & international equities (up to 60%), fixed interest and other lower risk assets primarily using passive low-cost index tracking and exchange traded funds. Asset allocation will be actively managed according to the attractiveness of opportunities in each asset class, whilst maintaining the balanced risk profile.

Income generated can be withdrawn quarterly (at the end of March, June, September or December) or reinvested into the portfolio.
